Special lists

September 10, 1933

GARDENSIDE NURSERIES INC.
SHELBURNE VERMONT.

LAST CALL.

September brings the last call for planting. Peonies, Trollius, and Hemerocallis, should be put out now. And Lilies are at their best, when freshly dug in mid-September, and planted back in your garden as soon as possible. And all of the early spring flowering plants, should be moved in the Fall, if they are to flower for you next Spring. Indeed, it is true of most Perennial Plants, that if well established the season before, the best bloom is realized.

Here they are, in our final offering, healthy strong field grown clumps in most cases, all Vermont grown. Prices include delivery as usual and we guarantee safe arrival. West of the Mississippi River, add 5% to these prices to cover extra mailing cost. PLEASE NOTE---5 plants, ALL ALIKE will be sent at the ten rate. 25 plants, ALL ALIKE, at the 100, rate.

LYCORIS AND HEMEROCALLIS.
A combination for shade.

A friend has called to our attention, that a combination of the Hardy Amaryllis and the Daylily, is splendid in the partial shade of the Wild Garden, the lawn edge, or anywhere that the sun fails to reach steadily. And the lush growth of the Hemerocallis tends to make less disconcerting the sudden appearance of the bare flower stems of the Lycoris. The planting of the two, together, gives bloom over a much longer period, and as both are very hardy, neither can crowd the other out. And best of all, thru the kindness of this friend, we have obtained a really fine lot of large bulbs, such as we have never had available, before.

We also learn that shade tends to make the Lycoris blossom quite a bit earlier, and that the best time for transplanting, is after bloom is past, in September. Hence this especial effort to attract your interest.

Any varieties of Hemerocallis may be used, and a full list of our varieties is to be found in this circular. But as a combination is suggested, we carry out the idea by offering one of the best of the medium priced Betscher varieties, with bulbs of Lycoris.

HEMEROCALLIS GOLDENI (bright golden yellow, blooms in early July). \$1.00
LYCORIS SQUAMIGERA (light pink flowers in August). \$1.00 each, 10 for \$9.

One strong plant of each, two in all, for \$1.85, postpaid.
Two of one, one of the other, three in all, for \$2.75, postpaid.
Three of one, two of the other, five in all, for \$4.50, postpaid.

No other Hemerocallis may be substituted for Goldeni.

A combination of Lycoris, with any other variety of Hemerocallis may be made by taking the price of the Daylily, and adding 95¢ each for the Lycoris. If five or more Lycoris are ordered in this combination, the price will be 85¢ each, all delivery paid, by the best method.

HYBRID HEMEROCALLIS.

The flowering season of these fine Daylilies, has again passed, and again we have been impressed by their genuine value in the midsummer garden. At this season, when bloom is so apt to be lacking, they fill the background of the border, the side of pool, brook, or wall, or the edge of walk in partial shade, with a long succession of fragrant flowers, in shades from the purest lemon yellow, to the richest apricot. As you see these plants in the gardens of your friends, you will want them, and now is the time to plant them. They are perfectly hardy, and they will increase in size if planted now, so that more blooms will result next season.

APRICOT. Clear bright yellow flower, good size and excellent form. June, 50¢

ANNA BETSCHER. Deep orange, touched bronze red. Early July. \$1.75

BAY STATE. Very large, pure glistening yellow flowers. July to August. \$1.

CALYPSO. A Burbank creation. Very fine light lemon yellow. \$1.00

DR. REGEL. Small foliage. Flowers late, with rich apricot blooms. Fragrant. 50¢

D.D. WYMAN. Light golden yellow, with a tawny splash. July and August. \$1.50

FLAVA. The Lemon Daylily. An old variety, but fragrant and excellent for massing. 30¢ each; 10 for \$2.00; 100 for \$18.00.

GEM. Deep orange yellow blooms, in early July. \$1.50

GEORGE YELD. Large flowers, nearly 6" across, rich orange and orange scarlet. One of the finest English varieties. \$2.50

GOLDEN I. Deep golden orange flowers in early July. \$1.00

GOLDEN BELL. Soft apricot-orange, with darker throat. July August. \$2.00

GOLDEN DREAM. The deepest golden yellow sort. Extra fine. \$2.00

GOLD DUST. Large, rich, clear golden yellow flower, in June. 35¢ each.

GYPSY. Orange-yellow. Tall, strong growing. We like it. July, August. \$2.00

HYPERION. The finest Hemerocallis we have, and one of the few American plants to win the coveted English Award of Merit. Purest canary yellow flowers on 4' stems, the blooms, 5-6" across. \$2.00

J.A. CRAWFORD. Extra large, cadmium yellow and apricot flowers. June and July. We consider it among the best. \$1.00

LATEST. A fine deep color, and one of the last to bloom. August. \$2.00

LEMONA. Pale lemon yellow, a glorified flava. July. Very lovely. \$1.00

LUTEOLA MAJOR. Splendid orange-yellow. July and August. 50¢

MRS. A. H. AUSTIN. Large flowers, deep golden yellow. July to August. \$2.00

MRS. W. H. WYMAN. Very pale, glistening, yellow. Late August. Delicate. \$1.00

RADIANT. A splendid clear pure orange. Next to Hyperion in quality and texture of the flower. \$2.00

ROYAL. A wonderful Japanese hybrid. Canary yellow. Wonderful texture. \$2.00

SHIRLEY. A fine English sort, with lemon yellow flowers, streaked with apricot-yellow. Flowers flattened, the edges curled. \$2.00

SIR MICHAEL FOSTER. Broad, gracefully arching foliage. Stout stems and flowers of the most beautiful yellow. One of the finest sorts. \$3.50

SOVEREIGN. Free flowering English variety. Orange yellow blooms, shaded brown on the outside. June. \$2.00

THUNBERGI. Much like flava, and fine for massing with that variety to prolong its season. Buttercup yellow. 30¢ each; 10 for \$2.00; 100 for \$18.

VARIEGATED LEAF. This is probably Kwanso variegata, tho it came to us from an odd source. The leaves are attractively striped with cream. A scarce variety. Stock limited. \$2.00.

All prices include delivery, except as noted on Page 1.

PEONIES.

All of our Peonies are one year old plants, from divisions made in 1932. They have flowered, and are splendid plants at the prices asked. The varieties include all but the very newest, and many of these we offer will never be surpassed. All prices include delivery. No plants can be shipped before September first, but after that until October.

ALBATRE. Better than Festiva Maxima. The finest white Peony. 75¢ each.
ALBERT CROUSSE. Very late, seashell pink flower of perfect shape. \$1.00
BARONESS SCHROEDER. A large, late, white, like a water lily. \$1.00
CHESTINE GOWDY. Silvery pink, growing deeper at the center. \$1.00
CLAIRE DUBOIS. A later M. Jules Elie. Wonderful silvery sheen. \$1.25 each.
DORCHESTER. The latest Peony. Fine deep pink, almost salmon. \$1.00
DUCHESS DE NEMOURS. Fine early white. A good moderate priced sort. 50¢
EDULIS SUPERBA. The earliest rose-pink sort. First Peony to open. 75¢
EUGENIE VERDIER. An early, extra large pink sort. Lasts well. \$1.00
FELIX CROUSSE. The best midseason red. Few better at any price. 75¢ each.
FESTIVA MAXIMA. The favorite white. Pink tipped petals. 50¢ each.
FRANCES WILLARD. An immense flower, blush-white, fading to pure white. \$2.
GEORGIANNA SHAYLOR. Extremely large, flesh-pink flower. Midseason. \$2.00
JAMES KELWAY. Rose-white, changing to milk-white. Early midseason. 75¢
MARL ROSENFELD. Fine rich velvety crimson. Midseason. Good. \$1.00
LADY ALEXANDRA DUFF. Immense, cup shaped bloom. Pale rose, shading lighter
LA FRANCE. Large, compact, rose-white. Midseason. \$2.50 each (\$1.00
LE CYGNE. The worlds finest Peony. White. Very large. \$2.50
LIVINGSTONE. Pale lilac-rose, with silver tips. Compact double flower. 75¢
LONGFELLOW. Brilliant crimson. Brightest colored sort we grow. \$2.00
LOUIS V. N. HOUTTE. A midseason, red. Double and good. 50¢ each.
MARGUERITE GERARD. Pale pink, fading to white. Enormous flat flowers. 75¢
MARIE CROUSSE. Pale lilac rose. Bomb type. Midseason. 75¢
MARIE LEMOINE. Latest white, and a fine large double sort. \$1.00
MARTHA BULLOCK. Very large. Deep rose pink, fading silvery pink. \$2.00
MARY BRAND. Finest red Peony grown. Midseason, and lasts well. \$1.50
MME. AUG. DESSERT. Bright rose, center flecked crimson. Early midseason. 75¢
MME. DUCEL. Large incurved silvery-pink bloom. Midseason to late. 75¢
MME. EMILE GALLE. Sea-shell pink. Ethereally beautiful. \$1.00
MME. JULES DESSERT. Pure white, with distinct pink center. \$1.50
MONS. JULES ELIE. Finest early rose colored sort. Always fine. 75¢
OFFICIN. LIS RUPRA. Early red "Decoration Day" Peony. \$75¢
PRIMEVERE. The nearest to yellow in this type of Peony. \$1.50
SARAH BERNHARDT. Apple-blossom pink. Immense flowers. \$1.00
SOLANGE. No other Peony like this. White, shaded brown. Beautiful. \$1.00
THERESE. Rich violet-rose. Enormous flower. \$2.00
TOULNGELLE. Delicate rose, over pearly white, shaded salmon. Late. \$1.50
TR. DE L'EX. DE LILLE. Flat fragrant hydrangea pink blooms. Fine. 50¢
VENUS. Pale hydrangea-pink with lighter collar. Midseason. 75¢
WALTER FAXON. Bright rose. A distinct, delicately colored bloom. \$1.50

SINGLE PEONIES.

These are in demand, for their landscape effect, and their charm. The opening buds are like roses.

LA FIANCEE. Single white. Indescribably graceful flower. \$1.00
L'ETINCELANTE. Rich clear carmine, broadly edged with silver. \$1.50

TROLLIUS.

All of the Globe Flowers we offer, are increased by divisions of the plant itself, and not by seedlings. Hence each plant is like every other plant of the same variety. This is a distinct advantage, when planning effects in the garden. All will be the same color and height, and will blossom at the same time.

These named sorts have always been scarce and higher priced, but we now have plenty of them, and offer fine young plants, at our regular prices. Try them with *Anchusa myosotidiflora*, or other early blue flower.

All at 25¢ each; 10 for \$2.00; 100 for \$18.00, -except as noted.

CANARY BIRD. Pale lemon yellow, tall and strong growing. One of the first to bloom, and very fine for cutting, long stems, and lasts well.

EARLIEST OF ALL. Light orange-yellow, and very early, sometimes opening in April. Often too, it flowers again, later in the season.

ELEANOR. A fine bright yellow variety, flowering profusely in late May, and into June.

EXCELSIOR. Bright orange-red flowers. Grows two feet high, and is a fine strong growing sort, that will usually give a good second bloom, if cut down as soon as thru flowering.

FIRE GLOBE. Bright orange, semi-double flowers on a moderately low plant. A very popular variety, tho not as bright as Orange Globe.

GOLDEN GLEAM. Golden yellow, and a very large double flower. One of the more recent varieties. 35¢ each; 10 for \$3.00.

HIS MAJESTY. One of the very best, with very large, round, orange-red flowers. Dwarf and compact.

LEDEBOURI. Large, orange yellow flowers. A fine type of bloom, and very satisfactory in the garden. Blooms till the end of June.

LICHTBALL. Extra large globe shaped flowers of orange-yellow, on strong stiff stems. Fine for cutting. Plant of medium height.

LODDIGESI. This is an extremely fine form, with bright golden yellow flowers, which maintain their close round shape until fully faded.

ORANGE GLOBE. A profuse bloomer, of robust growth. Very fine large orange flowers. We have a fine lot of these.

ORANGE PRINCESS. A very free flowering variety, with blooms of an extra deep orange. Flowers in May and June. 35¢ each; 10 for \$3.00

SALAMANDER. A fine orange variety, flowering late. It is tall and strong, is fine for cutting, and especially for garden effect.

TROLLIUS SPECIES.

T. ASIATICUS. This is a small flowered, bright orange sort, with a single row of petals, and many pointed petaloids in the center. A rich color.

T. CHINENSIS. This is a very fine form, growing three feet tall, with fine glossy foliage. Its greatest value lies in its late blooming date. The large flat bright orange flowers do not appear until late June, and last into July. Fine for garden effect, and for cutting.

T. EUROPEUS. We have a selected stock of the true form, with pale lemon yellow flowers. While not large, it is a fine sort, and is surpassed by Canary Bird, only in size of bloom. It is, perhaps, slightly paler.

MIXED SEEDLINGS.

These are strong, two-year old clumps, raised from seed saved from the varieties above. They vary in color, but seem inclined to the deeper shades. They will give splendid bloom, next year, as they are fully grown plants. 25¢ each; 10 for \$2.; 100 for \$18.00; 1000 for \$175.00

SHELBURNE HYBRID LILIES.

In June, and early July, one finds in almost every garden, nowadays the long fragrant trumpets of the Regal Lily, nodding on gracefully arching stems, above the Perennial Border, among shrubs and evergreens at the edge of the lawn, the back of the Rockery, or in the foundation planting. And when they are past, there is nothing to take their place, for while there are other kinds of Lilies, none have ever been so easy to grow, so sure to succeed, and perhaps, so pleasing. What would you give to have continuous bloom of Regal Lilies until well into August?

For now it is possible. Following Regal closely, so closely that the seasons mingle, are the Hybrids whose seed parent was Regal, known as Princeps. And then when they both are gone come the SHELBURNE HYBRIDS.

These are the result of a cross of Regal and Sargent's Lilies, both of the same type, but differing in the coloring of the outside of the bloom, the color of the anthers, the season of bloom. Regal has the most beautiful flowers, and is earliest, but the stems are nodding, and sometimes do not support the heads of flowers. Sargent's Lily has darker colored anthers, a stronger stiffer stem, and is later. It was the seed parent of the cross, and gives these new Lilies their strong tall stems, carrying bulbils in some cases, to make them more easily increased. And from Regal come the beautiful blooms, longer and larger than Regal, and with the brown anthers, in most cases. But the greatest change is in the season of bloom, for they are later than any of the others, flowering all thru August, and with a few blooms still showing, as this is written. And with us, on a sandy loam soil, they are stronger, taller, flower better, than Regal, Princeps, Sargent's Lily, or any other forms we have seen.

You will want these Lilies in your garden, and we have a fine lot of bulbs to offer this year. Bear in mind that these are seedlings, and are not a fixed type. They flower over different periods, and vary in minor characteristics, as well. But they are healthy sure to grow and flower, wherever Regal has grown well, and many places where it doesn't.

STRONG BULBS, 3-5 inch cir. \$2.00 each; 10 for \$18.00; 100 for \$175.00
EXTRA LARGE BULBS, 5-8 inch circumference, \$5.00 each; 10 for \$45.00.
PLANTING SIZE (some may flower), 50¢ each; 10 for \$4.50; 100 for \$40.00

LILIUM PRINCEPS.

This Lily, originating in Canada, is much like the Regal, and the Shelburne Hybrid, but is later than the first, and earlier than the last. Perfectly hardy, they serve splendidly to prolong the season of Regal, until the Shelburne Hybrids bloom. These we offer are seedlings from bulbs of the original stock, which we still have. While they do vary, they are a fixed type, and may be depended upon for good results.

STRONG BULBS, 3-5 inch cir. \$1.00 each; 10 for \$8.00; 100 for \$75.00

LILIUM REGALE.

Regal Lilies are almost too well known to need description.

STRONG BULBS, 3-5 inch cir. 30¢ each; 10 for \$2.50; 100 for \$20.00.

LILIES FOR THE ROCKERY.

In the Rock Garden, as well as in the low growing border, in full sun, or partial shade, these small Lilies find a place which suits them and in surroundings where they are rarely beautiful. The tallest one will grow not more than 36 inches high, and the average height of most is 2'. All have flowers as hard to conceal as the proverbial "sore thumb", but the brightness of their coloring, is not blatant, if given the foil of green foliage thru which most of them grow best. In fact, nearly all of these lilies are native to grassy plains.

In a sense, we offer these Lilies in place of the Holland bulbs. We find our soil suited to their culture, and our liking for them, has encouraged us to continue growing them in quantity, until now, we can offer them in all sizes, in large numbers, and at moderate prices. The Tulips and Daffodils have their place, but now that these American grown bulbs are available, why not give them a place in your planting?

LILIUM AMABILE. A fine little lily, with stems about 18" high, downy, and slender, but strong. The blooms are of Turks-cap shape, nearly 3" across and are called dull red. While it somewhat resembles a miniature Tiger Lily, it is not coarse, more graceful, and fine for the Rockery.

STRONG BULBS, 35¢ each; 10 for \$3.00; 100 for \$25.00.

LILIUM CALLOSUM. A tall (36") very slender stem, topped with two or more small Turks-cap like blooms, about the same size as the Coral Lily, but a dull red, instead of a bright color. Odd, and charming among shrubs.

STRONG BULBS, 35¢ each; 10 for \$3.00; 100 for \$25.00

LILIUM CERNUUM. This is the counterpart of the Coral Lily, in a lavender pink color. It does not grow so tall as the rest, and the slender stem and narrow leaves make it look fragile, but it is persistent, and holds its flowers up well. Seed which we purchased, has been badly mixed, and only recently have we been able to get any quantity of bulbs that we can be sure are true. If anyone has had mixed bulbs from us, we would like a chance to make the right.

STRONG BULBS, 35¢ each; 10 for \$3.00; 25 for \$7.00.

LILIUM CONCOLOR. This upright flowering Lily, with its one to three or more cup shaped blooms, at the top of an 18-24" stem, is just about the brightest colored sort we grow. It is a lighter red than the Coral Lily tinging on orange, we think, and all the petals are displayed to catch and reflect the light. In the Rockery, it is perfectly placed.

STRONG BULBS, 35¢ each; 10 for \$3.00; 100 for \$25.00; 1000 for \$200.00

LILIUM TENUIFOLIUM. Gracefully nodding Turks-caps of the brightest Coral scarlet, in quantities from one to twenty, on slender strong stems, 2' or more high. It should be scattered thru every Border and Rockery.

MAMMOTH BULBS, 35¢ each; 10 for \$3.00; 100 for \$25.00

STRONG BULBS, 20¢ each; 10 for \$1.50; 100 for \$12.00; 1000 for \$100.00

FLOWERING BULBS, 10 for \$1.50; 100 for \$7.50; 1000 for \$60.00

LILIUM TENUIFOLIUM, GOLDEN GLEAM. This is a yellow form of the Coral Lily and resembles it in all but color. Is inclined to be variable on some soils, becoming much deeper in color. Ours is a fine strain.

STRONG BULBS, 35¢ each; 10 for \$3.00; 100 for \$25.00.

FLOWERING BULBS, 10 for \$1.50; 100 for \$10.00.

All prices include delivery, except as noted on Page 1.

OTHER LILIES.

LILIUM CANDIDUM. The Madonna Lily. A place for this beautiful white lily is in every garden, and in every garden-lovers heart. It need not be planted with blue Larkspur, as is so often urged, for it is charming when massed alone, against shrubs or evergreens. Among Peonies and Phlox, or Trollius, or Hemerocallis, it has its place in almost any planting one thinks of. Our bulbs are the very best, North of France grown, that we can procure, and we expect them in mid-September.

LARGE BULBS (22-24 cm.) 30¢ each; 10 for \$2.50; 100 for \$20.00.

LILIUM AURATUM. The Gold Banded Lily. A moderate supply of bulbs, which have grown here, for one season.

LILIUM SPECIOSUM RUBRUM. The Showy Lily. This is the beautiful white and rose colored lily of Fall gardens. A moderate quantity of bulbs of our own growing.

Strong bulbs of either, 35¢ each; 10 for \$3.00; 100 for \$25.00

LILIUM HENRYI. The Yellow Speciosum. Much like the Showy Lily, but a fine bright yellow. Well established bulbs in heavy soil will carry 20 or more blooms. It flowers late, and is fine if planted with the protection of Evergreens.

STRONG BULBS (3-5") 35¢ each; 10 for \$3.00; 100 for \$25.00.

LILIUM CROCEUM. An upright, cup shaped bloom, 24-30" stem. Flowers of a bright golden yellow. STRONG BULBS, 35¢ each; 10 for \$3.00

LILIUM PHILIPPINENSE FORMOSUM. Like a hardy Easter Lily. Flowers here, very late in August, September. \$1.00 each, good bulbs of our own growing.

LILIUM SARGENTIAE. A trumpet lily, dull green outside, white with yellow throat. Moderate sized bulbs, have flowered. 35¢ each, 10 for \$3.00

LILIUM TIGRINUM SPL. A fine strain of the Tiger Lily. 20¢ each, 10 for \$1.

LILIUM TIGRINUM FL. PL. The Double Tiger Lily. 35¢ each; 10 for \$3.00

LILIUM UMBELLATUM. A mixed strain of the upright flowering type. Fine for massing where large effect is desired. 25¢ each; 10 for \$2.00; 25 for \$4.00

LILIUM WILLMOTTIAE. A tall gracefully drooping lily, carrying a large quantity of Turks-cap like blooms of an orange red. Fine for planting in evergreens. STRONG BULBS, 35¢ each, 10 for \$3.00

NATIVE LILIES

LILIUM CANADENSE. The Meadow Lily of the North. Beautiful yellow bells on a tall strong stem. Fine for naturalizing. 35¢ each; 10 for \$3.00

LILIUM GRAYI. Small bright red bells, somewhat lighter on the outside. Likes partial shade, and will grow very tall. 50¢ each; 10 for \$4.50

LILIUM PHILADELPHICUM. The Wood Lily. Grows here in sandy soils, in open woodland. Bright red cups on a short stocky stem. 25¢ each; 10 for \$2.00

LILIUM PARDALINUM. The Leopard Lily is a native of the West Coast. It is happy here on a sandy loam. Red-yellow Turkscaps, spotted. 50¢ each; 10-\$4.

LILIUM SUPERBUM. A Southern Lily, but perfectly hardy. Will grow very tall, and carry a large number of its reddish yellow Turkscap blooms, spotted with black. Fine in partial shade, or edge of shrubbery. Good for naturalizing. 35¢ each; 10 for \$3.00.

 We grow a number of other varieties of Lilies, but do not have sufficient stock to permit offering them. And we can usually obtain any variety desired. We will be glad to quote on any sort, on inquiry.

PERENNIALS FOR FALL PLANTING.

There are a few Perennial plants, that are best not planted in the Fall. But all of the rest, if they can be established at this season, will do so much better for you next year, that we urge their purchase and planting at this time. The following list, selections from the many kinds we grow, is offered for your guidance. We shall be glad to answer any questions concerning them, or others.

-
- ACONITUM AUTUMNALE. Fall flowering Monkshood. Pale blue flowers on three foot stems. Foliage glossy green.
- ACONITUM AUT. FISCHERI. Much like the preceding, but flowers porcelain blue.
- ACONITUM NAPELLUS SPARK'S VAR. A tall branching form of the July and August flowering Monkshood, and one that is recommended for every garden. It is splendid for cutting, grows well in full sun, or shade. Dark blue.
- ANCHUSA MYOSOTIDEFLORA. This Anchusa should be planted instead of the Forget-me-not. It is very much like that plant, when in flower, but the foliage during the summer is much better, the plant is more permanent. Excellent for the front of the border, mingled with Daffodils.
- ANEMONE MAGELLANICA. The white flowers are shaded so that the effect is a pale yellow. Stocky plant, 12" high, good foliage. Fine in Rockery.
- ANEMONE PULSATILLA. The Pasque Flower. One of the best of the early Spring flowers. Ours are mixed colors, red and violet shades.
- ANEMONE PULSATILLA ALBA. A white form of the Pasque Flower. Chaste and beautiful. Strong plants, 50¢ each, 10 for \$4.50.
- ANEMONE VERNALIS. The earliest Spring Anemone, and one that grows well for us in light and poor soil, in full sun. Violet cups, like great wooly Crocus blooms, white inside. Scarce and rare.
- ASCLEPIAS TUBEROSA. Butterfly Weed. Strong transplanted roots of this bright orange flowered midsummer favorite. Easily grown.
- ASTILBES. The Herbaceous Spireas thrive in any deep moist soil, and are perfectly hardy. Splendid in the middle of the border, for foliage as well as flowers. Fine for cutting. We have a number of kinds and offer strong clumps at 50¢ each, postpaid. They are heavy, delivery cost is high.
- A. AVALANCHE. White flowers, on 2' stems. The best white.
- A. GLORIA. Deep rose pink flowers in large close spikes. The finest color.
- A. JUNO. Flowers deep violet-rose. Strong erect growth.
- A. KRIEMHILDE. Salmon-rose. A paler color, but very beautiful.
- A. LOW WHITE. A form that grows only 18" high. May be used as an edging.
- A. MARG. VAN RECHTEREN. Flowers vivid lilac-red. Grows 3' above the 2' high foliage. A fine new sort.
- A. PROF. VAN DER WEILEN. Tall, with drooping white flower spikes. Choice.
- A. QUEEN ALEXANDRA. An old favorite, rosy pink flowers on good stems.
- A. ROSE PERLE. Rather dwarf. Pale pink flowers. Delicately beautiful.
- CAMASSIA ESCULENTA. Quamash. A bulbous plant, soon making large clumps, and bearing 2' spikes of pale blue flowers in June and July, or even earlier. Plant in clumps. 15¢ each; 10 for \$1.00; 25 for \$2.25.
- CAMASSIA LEICHTLINI. A taller and stronger western form. Prices same.
- CAMPANULA PERSICIFOLIA. Peach Bells. A fine strain of hybrids, in blue and white, sometimes doubled flowers.
- CAMPANULA MEDIUM. Canterbury Bells. Strong plants of these popular garden favorites. Single only and in three colors, Blue, Pink and White. Please state your choice in colors.
- DIGITALIS GLOXINAEFLORA. Foxgloves. We offer the giant SHIRLEY STRAIN, in varied colors. Strong plants.
-

All plants are priced at 25¢ each; 10 for \$2.00; 100 for \$18.00.

Except as noted.

Prices include delivery, --see Page 1.--5 (alike) at ten rate.

Perennials,-con.(For prices,see foot of preceding page)

DIELETRA FORMOSA.Plumy Bleeding Heart.Fine for massing,to carpet steep banks,for color in shade or sun.15-18" high.Extra good.

DIELETRA SPECTABILIS.Bleeding Heart.Fine old fashioned favorite.

DICTAMNUS FRAXINELLA.Gasplant.A strong growing perennial slow to get established but very satisfactory.Red or White flowers.State color.

DELPHINIUM CHINENSIS.Chinese Larkspur.Grows about 30" tall,with flowers in loose branching heads.Fine for cutting,or to mix in the border.We have both Blue and White.State color desired.

DELPHINIUM HYBRIDS.Fine young plants of a selected strain,grown in a Vermont garden.We believe them extra good.Mixed colors only.

DORONICUM CAUCASICUM.Leopard's Bane.A fine early flowering plant,much like a tall,bright yellow daisy.Clumps will flower well next Spring.

EUPHORBIA MYRSINITES.Sprawling blue gray foliaged stems,with bright yellow flower heads in quite early Spring.

EUPHORBIA POLYCHROMA.Erect plant,making a large clump,18" high,and flowering bright yellow,in early Spring.Beautiful.Fine in large Rockery.

HELENIUM AUTUMNALE.At this season,the tall stems,and branching flower heads of the Sneezeweed,make a fine showing at the back of the Border,or against Evergreens.This is bright yellow.

HELENIUM AUT. RUBRUM.The true red form,quite bright in color.

HELENIUM RIVERTON GEM.A bronzy red form,much admired.Fine for cutting.

IRIS CRISTATA.The little crested Iris,fine for sun or shade.Clear porcelain blue flowers.Very useful for holding banks in the Rock Garden.

IRIS SIBIRICA.Of the tall grassy Iris,we have a number of fine forms.

BUTTERFLY.Soft uniform sky blue.Falls somewhat lighter.

EMPEROR.Large,very dark blue flowers.Tall.

FLORRIE RIDLER.We think the finest form.Exquisite blue flowers.

PEGGY PERRY.Large ruffled flowers of rich violet-blue.Early.

PERRY'S BLUE.Bright sky blue.The best of the color.

SUNNYBROOK.Alice blue.Very much admired.

SNOW QUEEN.Pure white,with golden yellow throat.

LIATRIS PYCHNOSTACHYA.Kansas Gayfeather.Bright rosy purple spikes.3'

LIATRIS SCARIOSA.Flowers in larger individual flower heads,and wider spaced on the stem.Color same.The finest form.Excellent for cutting.

LIATRIS SCARIOSA ALBA.The white Gayfeather.Scarce.50¢ each.

TRILLIUM GRANDIFLORUM

The lovely white Wake Robin,or Trillium grows readily in almost any part of the garden.We have a fine lot of large roots,which may be planted with perfect safety at this time.25¢ each;10 for \$1.50.

FRINGED GENTIAN.

Again the Fringed Gentian(*Gentiana crinita*) is flowering in our own colony,near the Nursery.We expect to have a good crop of seed to offer,sealed in leadfoil,at 50¢ per packet,postpaid.Scattering the seed on moist banks,among low grasses,etc.,so that the plant may grow naturally still seems to us the best method of handling.

NATIVE PLANTS.

On Pages 9 and 10 of the July 10th circular,will be found a complete list of Native Plants,which we are prepared to supply,this Fall,with prices and terms.If you have mislaid your copy,please write us for another.For Fall delivery,the prices are very low.

With the exception of the offering of Native Plants on Pages 9-10 of the July 10th Circular,as noted above,this list cancels all previous offerings and prices.We reserve the right to change or withdraw any price or variety,at any time.
